

```
#include<iostream>
#include<fstream>
using namespace std;

int main()
{
    ifstream fin;
    char szText[50];

    fin.open("file_to_screen.txt");

    if(fin.fail())
    {
        cout << "\nCant Open File\n";
        return -1;
    }

    while(fin.getline(szText, 50))
        cout << szText << "\n";

    return 0;
}
```
